Rowshanara Akhter

FULL STACK WEB DEVELOPER | AI AGENTS, RAG & LLM INTEGRATION | SaaS
Dhaka, Bangladesh | 01349817338 | 01779524129 | rowshanaraakhter9@gmail.com
Portfolio: rowshanara.dev | GitHub: rowshanaraakhter | LinkedIn: rowshanara-akhter-4a8042258

PROFESSIONAL SUMMARY

Full Stack Web Developer building modern web applications with React, Next.js, TypeScript, Node.js/Express, and Laravel (PHP). Hands-on experience integrating LLM APIs and developing chatbot and AI-powered features, including work with AI Agents and Retrieval-Augmented Generation (RAG) for approximately one year. **Currently developing an AI chatbot product and a multi-tenant SaaS platform.** Experienced in REST API development, database design and optimization, authentication, third-party payment integrations, real-time features, deployment, and production bug fixing/problem solving. Built and deployed multiple full-stack projects from frontend architecture through backend APIs and post-launch maintenance.

TECHNICAL SKILLS

Frontend	React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Zustand
Backend & APIs	Node.js, Express.js, Laravel (PHP), REST API Design, API Integration, JWT & Session Authentication, Middleware Architecture
AI Engineering	LLM API Integration (OpenAI, Claude), AI Chatbot Development, AI Agents / Agentic AI, RAG Pipelines, Prompt Engineering, AI-powered matching and recommendations
SaaS Architecture	Multi-Tenant SaaS Development, Tenant-Aware Data Modeling, Authentication & Access Control
Databases & Data	MongoDB, Mongoose, MySQL, Redis (Caching), Schema Design, Query Optimization, Aggregation Pipelines, Indexing
Testing, Reliability & Deployment	Git/GitHub, Docker, VPS deployment, Postman, Vercel, CI/CD Pipelines, debugging, production bug fixing, performance optimization
Payments & Security	Stripe, SSLCommerz, JWT authentication, HTTP-only cookies, SHA-256 webhook signature verification
Computer Science	Data Structures & Algorithms

WORK EXPERIENCE

Full Stack Web Developer — Freelance / Remote
Dhaka, Bangladesh | 2024–Present

- Build and maintain full-stack web applications using React, Next.js, TypeScript, Node.js/Express, and Laravel.
- **Currently developing an AI chatbot product and a multi-tenant SaaS platform.**
- Integrate LLM APIs and AI-powered chatbot, job-matching, and recommendation features; work with AI Agents and RAG concepts/pipelines.
- Troubleshoot application issues, identify bugs, implement fixes, and improve reliability and performance.
- Design and optimize REST APIs, data models, authentication flows, and database queries; support deployment and post-launch maintenance.

SELECTED PROJECTS

AI Chatbot Product — LLM APIs, AI Agents, RAG (In Progress)

- Developing an AI-powered chatbot product using LLM APIs, with AI Agent and Retrieval-Augmented Generation (RAG) approaches.

Multi-Tenant SaaS Platform — Full Stack (In Progress)

- Building a multi-tenant SaaS product where multiple organizations share one application with their own separate data and access.

E-Commerce Platform — Next.js, Node.js/Express, MongoDB

- Built a full-stack e-commerce application with secure JWT authentication using HTTP-only cookies and Zustand-powered cart state.
- Optimized Mongoose aggregation and indexing to reduce N+1-style data access patterns; improved API response time through query batching and connection pooling.
- Integrated Stripe and SSLCommerz payment flows with SHA-256 webhook signature verification.

Real-Time Delivery Tracker — Next.js, Node.js, Socket.io

- Developed real-time courier tracking with heartbeat, reconnection, and connection-fallback handling.
- Reduced websocket bandwidth by broadcasting coordinate deltas rather than full location structures; throttled updates at a 250 ms interval.

AI Job Matcher — React, Next.js, LLM APIs

- Created an AI-powered job matching interface that analyzes user skills and resume data to surface relevant job listings.
- Integrated OpenAI and Claude APIs using prompt templates and streamed responses for AI-powered matching and recommendations.

Micro Job Application Platform — Laravel (PHP)

- Built a job-posting and application platform using Laravel MVC architecture.
- Used Eloquent eager loading to eliminate N+1 query loops and improve database retrieval efficiency.
- Integrated AI-driven matching logic and developed a responsive dashboard.

EDUCATION

Bachelor of Arts in Philosophy — National University, Bangladesh

ACHIEVEMENTS

- Top 50 / 900+ teams — SOLVIO AI Hackathon 2025

LANGUAGES

Bengali — Native | English — Professional working proficiency
